## SOFTWARE ENGINEER

---

Full Stack Web Developer. I learned HTML and CSS independently by analyzing website source codes. I am experienced in front-end and back-end technologies. I aspire to integrate my passion for lifelong understanding by analyzing data with my education and hospitality background and my hobbies of designing and arts and crafts to assist high-growth companies in comprehending their customers' necessities and developing creative software.

## TECHNICAL SKILLS

---

JavaScript, ReactJS, Redux, Ruby on Rails, Python, HTML, CSS, PostgreSQL, SQL, Material UI, TailwindCSS, Node.js, npm, yarn, Bcrypt, localStorage.

**In the works:** Websockets, Python

## TECHNICAL PROJECTS

---

### TakeAHike - [Github](#)

Website application that creates opportunities for members to be able to participate in hikes that they potentially visited. - -

- Implemented Redux to add hikes to members profiles.
- Create with Redux/React/JavaScript front-end.
- Ruby on Rails and PostgreSQL back-end to manage data for users/members.

### Portfolio Website - [Github](#)

My Personal Website Portfolio
